

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) An assembly of mouldings that can be joined together to form ~~and used as~~ a floating structure, comprising at least two mouldings ~~the assembly comprising a first moulding and a second moulding each of which is produced by a rotational moulding process, each of said mouldings having a hexagonal outer profile incorporating a plurality of joining portions, said joining portions comprising flat outer faces of the moulding disposed at an angle one to another so that a first moulding can be joined to a second moulding with any one of said joining portions of said first moulding in a face-to-face relationship with a joining portion of the second moulding and has an outer face incorporating a first zone and a second zone which zones are so shaped that the first moulding can be joined to the second moulding in a first disposition in which the first zone of the first moulding is in face to face relationship with one of the zones of the second moulding or in a second disposition in which the second zone of the first moulding is in face to face relationship with one of the zones of the second moulding.~~

2. (currently amended) An assembly of mouldings according to claim 1, further comprising ~~in which the mouldings include~~ a third moulding having an outer face profile incorporating at least two joining portions, shaped so that a first zone and a second zone which zones are so shaped that the third moulding can be joined to the second moulding in at least two different positions with said joining portion of said third moulding in a face-to-face relationship with a joining portion of the second moulding ~~a first disposition in which the first zone of the third moulding is in face to face relationship with one of the zones of the second moulding or in a second disposition in which the second zone of the third moulding is in face to face relationship with one of the zones of the second moulding.~~

3. (canceled)

4. (currently amended) An assembly of mouldings according to claim 1, ~~in which~~ wherein the mouldings have outer profiles that are substantially similar ~~[[one]] to the other one~~ another.

5. (canceled)

6. (currently amended) An assembly of mouldings according to claim 1, wherein ~~in which~~ at least one of said

mouldings ~~moulding~~ has an end face that is disposed in a face-to-face relationship with an end face of ~~a fourth moulding~~ another one of said mouldings to which said at least one moulding is joined.

7. (currently amended) An assembly of mouldings according to claim 1, wherein ~~in which~~ the mouldings are of a moulded ~~plastics~~ plastic material.

8. (previously presented) A hull-and-deck structure for a boat comprising an assembly of mouldings according to claim 1.

9. (new) An assembly of mouldings that are joinable together to form a floating structure, said assembly comprising at least two mouldings each having a hexagonal outer profile that includes a plurality of planar joining portions, said planar joining portions being disposed at a 120° angle to one another, a first one of said mouldings is joinable to a second one of said mouldings by any one of respective said planar joining portions of said first and second mouldings in a face-to-face relationship.
